Canada Safe In Ship Sale

OTTAWA (UPI) — The Canadian National Railways says the security of a sale of eight ships to Cuba, completed last summer, is sound, Transport Minister Hees told the Commons yesterday.

Payments on the $2,800,000 deal were secured by the Cuban National Bank and guaranteed by the National Bank of America.

London scientists A. G. Gaydon and R. C. M. Learner, reproduced theoretical moon conditions inside laboratory by filling flask with dry powder, creating partial vacuum above powder and letting air seep through from small holes in bottom of the flask. Blow-holes such as one in photo were formed in the powder. This tiny crater, with a small pimple in the centre, bears a striking resemblance to a moon crater.

Anti-Dumping Order

Cotton Duty Hiked

OTTAWA (CP)—Revenue Minister Nowlan yesterday confirmed that several weeks ago he ordered anti-dumping customs regulations to take effect on second-quality merchandise, mostly cotton fabrics.

He gave the information in reply to Opposition Leader Pearson who asked about news reports of the action.

Two weeks ago allowable price discounts for seconds were cut by one-half and dumping duties will be applied if the price discount on this class of merchandise is greater than set by the department.

Discounts of 10 and 20 per cent have been allowed for years by the department but these now are being cut to five and 10 per cent on various kinds of cotton fabrics such as denims, twills, drills and cotton sateens.

Mr. Nowlan gave no direct reply to Mr. Pearson's question as to whether the action applies to Britain.

YUKON MUSEUM

The MacBride Museum at Whitehorse, Yukon Territory, has thousands of items of the great gold rush in 1896.

$100,000,000 More For National Road

OTTAWA (CP)—The government gave notice yesterday of its intention to seek parliamentary approval for an additional $100,000,000 for federal spending on the Trans-Canada Highway.

Did Gas Crater Moon?

LONDON (UPI) — Two scientists reproduced theoretical moon conditions inside laboratory bottles and came up with evidence that the moon's innumerable craters are blow-holes.

What was once blown through the holes was gas trapped beneath the moon's surface, the scientists reasoned, thus giving indirect support to the Russian scientist who recently reported seeing what he took to be a volcanic eruption on the moon.

Many scientists thought the Russian had made a mistake because volcanic eruptions we know on earth require extremely high temperatures beneath the surface, and the scientific evidence that the moon is a cold moon without any heat of its own, is all but overwhelming. But the evidence from the bottles showed you can have cold volcanic eruptions.

A. G. Gaydon and R. C. M. Learner supposed that the moon's surface is composed largely of a fine, powdery dust. There is enough evidence that that is so for some scientists to believe the earth rockets which eventually reach it, will disappear without a trace into a deep dust layer.

They supposed further that large quantities of gas were trapped under pressure beneath this outer layer. Then the scientists turned to their bottles which were partly filled with magnesium carbonate, a very light powder.

Suction was applied to draw out the air trapped in the powder. Blow-holes appeared looking exactly like pictures of the moon's craters.

Come home, Joe!

THE B.C. CIVIL SERVICE

Requires

Designing and Structural Engineer 2

Bridge Engineer's Office, Department of Highways, Victoria

Salary: $460 - $550 per month. Duties include designing all types of bridge, preparing estimates of cost, and related work. Applicants must be British subjects, registered with the Association of Professional Engineers in B.C. For application forms and further information, apply to the Chairman, B.C. Civil Service Commission, 544 Michigan St., Victoria, not later than February 11, 1959.

COMPETITION No. 59: 42A

You asked for it...

SO HERE IT IS!

LAURENTIAN *Vista Sport Sedan*

A GENERAL MOTORS VALUE

A NEW 4-DOOR HARDTOP IN THE LOW-PRICED LAURENTIAN SERIES

Here it is, the most desired Pontiac model of all . . . the 4-door hardtop . . . now brought to you at a lower price than ever before. Look at it! The Laurentian Vista Sport Sedan is an elegant car indeed . . . clean and uncluttered with a distinct look of liveliness. Slam the door, tap the body, try the engine . . . you can "feel" its quality.

Notice the amount of glass. The Observation Lounge Rear Window stylishly sweeping around the rear seat gives you complete, safer vision. The Vista Panoramic Windshield wraps right around to the sides and actually curves high into the roof to let you read overhead signals and signs comfortably. And accenting this look of luxury is the eye-catching extension of the strong, slim roofline.

Yet all this luxury and beauty goes even deeper . . . as you will discover when you take the new Laurentian for a test drive. The performance, handling ease, comfort, and economy all have to be experienced to be appreciated. Experience them today . . . you know where!

Like the other popular Laurentian models shown here, the new Laurentian Vista brings you all the wonders you've waited for!
